DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 and 19-25, drawn to a method in a computer system for logging data, classified in class 705, subclass 26.
 - II. Claims 13-18 and 26-30, drawn to a method in computer system for billing for processing data, classified in class 705, subclass 32.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination (claims 13-18 and 26-30) and subcombination (claims 1-12 and 19-25). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it doesn't require selection of a sequence of components and including specific input and output formats. The subcombination has separate utility such as it may be used with a system that doesn't require determining a price for billing.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3627

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Maurice Pirio on 10/15/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
